- Managed to do data acquisition from the database using SQL query design for analysis and reporting
- Responsible for carrying out market analysis and business development

Research and Data Modeling Intern (Sanyati Baptist Hospital)

January- April 2024

- Medical data acquisition and modelling for reporting
- Data capturing and validation in the DHIS2 Health System
- Developing predictive and disease classification models to simulate different health outcomes
- Report generation and communication to stakeholders

EDUCATION

MIDLANDS STATE UNIVERSITY – BACHELORS DEGREE IN DATA SCIENCE AND INFORMATICS

- First Class Degree in Data Science and Informatics
- **See scripts on**: *https://tynoschakafa.netlify.app/*

CISCO NETWORKING ACADEMY - NETCAD CERTIFICATIONS

- Cyber Security Certificate
- Data Analytics Certificate
- Fundamentals of Data Science Certificate
- Python Programming Certificate (in Association with OpenEDG Python Institute of Programming)

IBM SKILLSBUILD STUDENT AMBASSADOR PROGRAM – AI and ML CERTIFICATE

- Data Visualization in Python
- Machine Learning
- Artificial Intelligence

PROJECTS

- Inflation Prediction Model
- Stock Manipulation Detection using Machine Learning
- Genome-based patient risk classification system
- Disease Classification Model
- Digital Footprint Analysis System
- Energy Consumption Anomaly Detection
- Automated Loan Approval Model
